

1. Digitalcafe.md

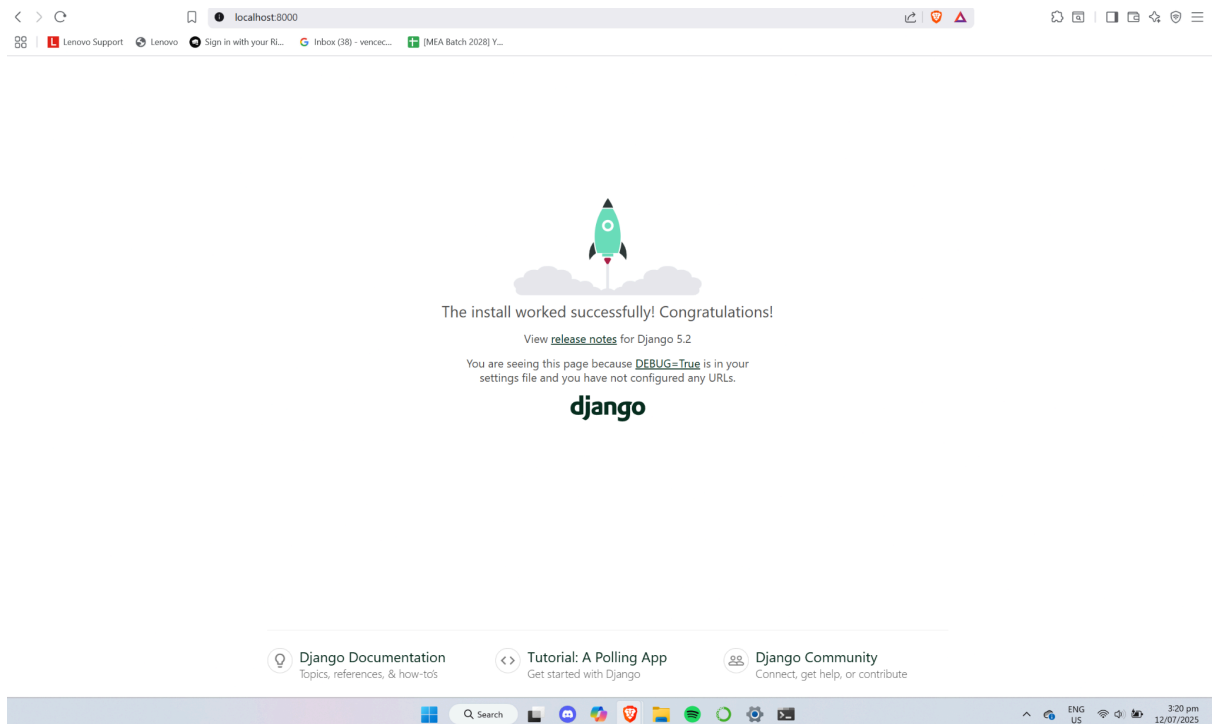

```
Type 'django-admin help <subcommand>' for help on a specific subcommand.

Available subcommands:

[django]
check
compilemessages
createcachetable
dbshell
diffsettings
dumpdata
flush
inspectdb
loaddata
makemessages
makemigrations
migrate
optimizemigration
runserver
sendtestemail
shell
showmigrations
sqlflush
sqlmigrate
sqlsequencereset
squashmigrations
startapp
startproject
test
testserver

Note that only Django core commands are listed as settings are not properly configured (error: Requested setting INSTALLED_APPS, but settings are not configured. You must either define the environment variable DJANGO_SETTINGS_MODULE or call settings.configure() before accessing settings.).
(env) PS C:\Users\vence\digitalcaferoot>
```

2. Hello Django.md

3. Your First Page.md

4. HTML.md

5. The database.md

The screenshot shows a code editor with several tabs: settings.py, urls.py, views.py (active), index.html, and models.py. The views.py file contains the following Python code:

```
from django.http import HttpResponse
from django.template import loader
from django.shortcuts import render
from .models import Product

def index(request):
    products = Product.objects.all() # Query all products from DB
    return render(request, 'index.html', {'products': products})

# Create your views here.
```

```
>>> Product.objects.all()
QuerySet [<Product: Americano>, <Product: Cappuccino>, <Product: Espresso>]>
>>>
```

6. The admin site.md

7. Viewing products.md

Product name: Espresso

[← Back to products](#) Product price: ₱100

Available Products

Product Name	Price (PHP)
Americano	110
Cappuccino	130
Espresso	100

8. Users.md

Page not found (404)

Request Method: GET
Request URL: http://127.0.0.1:8000/accounts/login/?next=/

Using the URLconf defined in digitalcafe.urls, Django tried these URL patterns, in this order:

1. admin/
2. [name='index']
3. product/<int:product_id>/ [name='product_detail']

The current path, accounts/login/, didn't match any of these.

You're seeing this error because you have `DEBUG = True` in your Django settings file. Change that to `False`, and Django will display a standard 404 page.

Hi, cafeadmin!

Available Products

Product Name	Price (PHP)
Americano	110
Cappuccino	130
Espresso	100

9. The cart.md
